for the Investor.

The telephone is playing an important part in modern railroad development as an element of safety, as well as facilitating business operations. The completion of the installation of the telephone block signal system on the 147 miles of the outhern Railway between Macon and Jesup is announced by Vice-President and General Manager E. H. Coapman. A telephone line, with stations at every passing track, has been constructed, and fifty ad- ing to say: telephone-telegraph operators Three additional ployed in the Atlanta division headquarers, to give their entire time to the Macon-Jesup line. Safety and facility in the introduction of this new system. The tant lines of the Southern system and has been found entirely successful. With of 61.5 per cent. the installation of this modern system of signalling between Macon and Jesup the Cincinnati and Jacksonville are protected in the most efficient manner.

Steel Car Equipment.

The announcement that the Lehigh Valby Railroad has placed orders for 100 allsteel cars for use in its passenger trains | the country." s one of the important items of trade news of the last week. This is one of the place the Lehigh Valley well up in the forefront of American roads in the use of steel equipment.

Figures just given out by the Pennsylof steel passenger cars used in that state. stand on the top of the list. Recently it was ascertained that more than 60 per cent of all the cars now used in service between New York, Philadelphia and Butincluding sleeping and parlor cars, were of steel construction. The new cars will materially increase this figure,

The all-steel equipment just ordered enuipped with all the modern improvenents in this direction, ten smoking cars ind twenty-five baggage and express

Rumored Dividend.

nors have been current recently that Central Leather common would enjoy an tarly dividend, but these rumors have not received official indorsement so far as can be learned, and it is doubtful whether such action will be considered in the near future. It is stated that this has been a very fair year for Central Leather, but in view of the company's record for earnings the outlook is not encouraging for a ear declaration, although many stockholders are persistently calling for dividends, especially those who paid around or better for their holdings. It may not be impossible for the company to declare a small dividend on common, but it is doubtful whether it will be expedient in the immediate future.

September Railroad Returns.

The returns for the month of Septemof fifty representative railroad systems operating in all sections of the counper cent, while net earnings decreased Nassau County, Fla. O per cent. This compares with an increase in gross of 1.10 per cent and a de-Was 66.95 per cent, as against 63.89 per twenty-year levee construction bonds. cent in September, 1912. Operating ratio

for August, 1913, was 68.56 per cent. decreases in net. September returns, with improvement bonds. their distinct improvement over August ramings, have broken the sequence of the secline. Another factor making Septemter earnings appear more favorable is that comparison is with increased earnings in 1912, when gross showed a gain of \$42 per cent and net a gain of 9.28 per

Pig Iron Production.

The United States Steel Corporation the country's total, also 16,901,223 tons of isgot, equal to 54,1 per cent of the whole output of the country. The Steel Corporaton has been showing gains in the percentage of the output of the country's note that the corporation was a heavy Durchaser of pig iron in the open market during the first two years of its organization. Since that period, however, its profuction has been brought up to a point output in 1901 was equivalent to 66.2 per \$1,709,579. cent of the total output of the country. while in 1912 it was only 54.1 per cent, than during the first six years of the cor-Poration's existence, as in that period-from 1901 to 1906—the ratio fell from 66.2 to Est per cent, while from 1906 to 1912 the the was from 57.7 per cent to 54.1 per cent. This shows that the corporation has been able to more nearly sustain its ratio of ingot production in the last few years than formerly.

PUBLIC UTILITY NOTES.

The Central Illinois Public Service Comany has filed with the Secretary of State | G of Illinois papers certifying an increase n capital stock from \$6,000,000 to \$10,000,000. The company is working out a scheme for merging of the public utilities in

Buffalo & Williamsville Electric Ry.

The Upstate Public Service Commission as received an application from the Buffalo & Williamsville Electric Railway Company, for permission to abandon the street railway lines in Batavia on the ground that it is losing money by operating it. The Batavia line is a part of the Buffalo & Williamsville to Rochester, a distance of sixty miles, but only the part of the line in Batavia has been built. Citizens of Batavia objected to the abandonment of the line, and officers of the company have offered to sell it to them for \$10,000. The commission adfourned the hearing until November 29

BRIEF NOTES OF FINANCE pany, one of its principal subsidiaries, and Moritz Rosenthal, a director, rumors were affoat that they are contemplating a new financial plan for the United Railways of San Francisco. This line is the only one of the subsidiary properties of the United Paragraphs of Current Interest Railways Investment which has not been placed on a sound financial basis. Last year there was a rearrangement and refinancing of the Philadelphia Company and its subsidiaries which placed them on a good basis, and it is expected that the trip of officials of the holding company to San Francisco will be followed by attempts to refinance the United Railways.

Stability of Public Utilities.

Samuel Insull, speaking before the Intion in Chicago recently, had the follow-

"From 1886 to 1898 the amount of electric current which could be purchased for dispatchers have also been em- \$1 remained the same. From 1898 down to the present time, partly from improveoyed in the company has issued the eleventh edition of its annual publication, "Trust Comments in generating and transmission syspanies of the United States." The trust companies of Cauada are also included in creasing until now there has been an imglephone has been tried on other impor- provement of 268 per cent in lamp efficiency and a decrease in the average rate

THE CROP MARKETS

Grains All Show Advances-Coffee Splits Changes.

Foreign crop conditions were the higher. Trading remained small all governing influence in the wheat mararound. American Shipbuilding common, ket yesterday, but buyers were not over-American Can common and Radiator anxious about stocking up, and although common were unchanged. Union Carbide conditions were in their favor, the net advance for the day was only 40%c. declined. The selling of Ogden Gas 5s forced down prices 2 points, to 93. Other Corn was firm on the strength of small stocks in the West and the effect of this condition on the December option. The close showed December 1c up from the previous close, with other months 14 @ %c up. Oats followed corn, gaining 4@ %c net.

Mixed conditions prevailed in the coffee market, foreign firmness causing an early advance, which was partly lost when Brazilian shippers were credited with being willing to sell at concessions. The close was rather heavy. prices being 1 point below to 4 points above the finals of Friday.

OILS—Refined petroleum steady. Linseed oil quiet at recent prices.

RICE—The railread strike in the Southwest is said to be interfering with the movement, and while the inquiry was quiet prices were firm for all grades.

SUGA—Refined firm and unchanged, with all refiners taking orders at 4.30c, although the list was 4.35c for fine granulated. No business in raw, but the tone was firm and prices were repeated at 3.64@3.67c for centrifugal, 3.14@3.17c for muscovado and 2.89@2.92c for molasses. It was pretty generally admitted that no sugar could be bought under 3.67c for centrifugal, as holders in some cases were asking higher prices. In London beet sugar showed a slight reaction for near positions, with November quoted 9s 54d, December 9s 6d and May 9s 10%d.
